

Breakout Session Discussion Questions

2025 Accounting Educators Exchange

June 6, 2025

Use the following questions to guide your 30-minute breakout session discussions. These are designed to encourage idea sharing, reflection, and practical collaboration among attendees.

1. What's one strategy your program has used to support students through the CPA licensure process, and how effective has it been?
2. What challenges have you faced in integrating AI or emerging technologies into your curriculum, and how have you approached them?
3. How are you preparing your students to navigate the ethical implications of AI and automation in accounting?
4. What does successful data analytics instruction look like in your classroom? What tools or methods have made the biggest impact?
5. Where do you see gaps between what students learn in class and what the profession expects? How are you working to close those gaps?
6. How are you adapting your teaching methods to meet the needs of today's students (e.g., hybrid/online learners, Gen Z expectations, etc.)?
7. Have you collaborated with employers, alumni, or advisory boards to shape your program? What's worked — or not worked?
8. What's one thing you've learned or are excited to try from today's sessions — and how might you implement it at your institution?
